Tracking your Project's Essentials

A Successful Measuring Tool

Projects[+], from Kapcite, is a geospatial projects tracking solution that can be used by governments and businesses to monitor their projects' performance and share their status with key stakeholders and the general public. The solution interprets complicated enterprise data, converts it into online geographically relevant and timely information, and compiles it under one source for quick analysis and instant action.

Designed for Fast-Track Business Decisions

Projects[+] is a single integrated platform with an intuitive interface where executives and professionals can view and analyze all monitoring data on a single screen as a web-based or a mobile application. By gathering and reporting reliable, transparent and easily accessible data and information, Projects[+] allows decision makers to coordinate the full development and the effective implementation of their projects, while facilitating quick corrective measures. By leveraging the enabling geospatial capabilities to easily define, visualize, plan, track and analyse project data, Projects[+] helps improve capital investment planning, control and monitoring.

Manage your Greatest Assets Wisely

Projects⁺ is compose d of four distinct but integrated modules; each ensures the best project management and the efficient utilization of resources.

Projects⁺ Dashboard

Projects⁺ Dashboard allows executives to monitor the project's performance through Key Performance Indicators (KPIs) to help them address concerns quickly and take informed decisions.

Projects⁺ Analyst

Projects ⁺ Analyst is a map-centric projects performance reporting application where project managers interact directly with the map for data visualization, monitoring and analysis. Some amount of spatial data viewing capabilities can be made accessible for public transparency.

Projects⁺ Editor

Projects ⁺ Editor encompasses two key components, Map Editor and Project Editor. Map Editor allows project managers to define and manage the location of the project on the map while the Project Editor helps the project managers define the project's attributes and populate periodic progress.

Projects⁺ Administrator

Projects⁺ Administrator allows the administrator to manage user accounts as well as define access controls, user permissions and privileges.

Easy Integration with Core Business Systems

Developed using JavaScript, Projects⁺ is a web-based solution that can be easily integrated with other IT systems and data providers to fully utilize the project's data available.

Brought to you by K&A

Projects+ is a geospatial projects tracking by Kapcite,
a solution of Khatib & Alami (K&A). Kapcite is a pioneer of
efficient technology with three decades of experience, tapping
into the potential and usefulness of Geographic Information
Systems across governments, businesses, clients, and users.
