

Make Every Trip an Unforgettable Memory

Track and record your Trips and Memories

Trips+ is a mobile application allows you to record your trip routes, save memories and share your experiences. It's a handy app for all kinds of outdoor activities like exploring places, driving around, hiking, cycling, skiing and much more. While recording your trips with Trips+, you can continuously view your current location on the displayed map along with all trip statistics.

Make it a Story that Lasts Forever

Be it a solo adventure or a journey with the crew, Trips+ offers helpful features, making it a must-have on every trip.

With Trips+ features, each trip can tell a story. Whether by recording your route, taking photos on your journey, saving special points of interest and even recording your experience using voice memos, Trips+ is the ultimate app to take with you on your next adventure.

You can also relive the experiences and memories you saved, or share them with your friends and family.

Create Memories using **Great Features**

PLAN A TRIP

Easily plan your trips by searching for interesting or nearby locations, create the route for your trip and navigate with ease.

CUSTOMIZE

Define your own settings for measuring units, trip colors, buffer distance and auto-save intervals.

ARCHIVE

Record and save your trips. While recording a journey, you can pause, resume, or save it to your list of trips. You can even link images, videos and voice notes to specific locations.

RECALL

Recall past experiences with its media shown along the route. This feature helps you find your way back without getting lost.

SHARE

Share your route, points of interest and pictures with friends and other TripTale users so they can follow your steps.

OFFLINE MODE

Offline map support allows you to download a specific area map locally on the device and record the trips later in offline mode.

IMPORT & EXPORT

Import or export trips to GPX, KML and KMZ formats and publish your trips on Esri's ArcGIS app.

Brought to you by K&A

Trips+ is a geospatial map viewer by Kapcite, Khatib & Alami (K&A) Platform for Smart Solutions.

Kapcite is a pioneer of efficient technology with three decades of experience, tapping into the potential and effectiveness of Geographic Information Systems across governments, businesses, clients and users.
